# SUMMER SAFETY CAMPAIGN 2007

The purpose of this campaign is to align the USAG Humphreys Summer Safety Program with IMCOM-KOREA, USFK and Department of the Army Summer Safety Campaign to ensure no loss of life, and minimal injuries and equipment damage. Things that get command emphasis get done. This safety campaign must receive command emphasis down to the individual soldier level. Commanders and Directorates will integrate safety requirements of this campaign into their daily missions. We must eliminate any concept of a separate safety program; especially one that can be described as an afterthought or a “check the block” exercise. Composite risk management is not a parallel task; it is an integral part of planning and executing to standard. Finally, we must motivate our team members to become actively involved with a conviction derived from taking care of family and friends.

COL Michael J. Taliento Jr.
